1. PROFESSIONAL SUMMARY

I work where an energy system's daily operation turns into a financial decision – building models that decide how storage and generation should be dispatched, then testing whether the investment pays off. At OTH Amberg-Weiden, this has meant sector-coupled system models and an investment feasibility tool for solar and battery storage, alongside coursework in energy management and market analysis. Before Germany, I spent nearly two years running European key accounts at BFG International, plus HVAC commissioning and industrial piping experience. I'm looking to bring that mix of modelling and commercial judgement into energy management.

Seeking Werkstudent | Internship | Thesis

2. PERSONAL DATA

Visa / Status Student visa – Werkstudentenprivileg, 20 hrs/week (Germany)
Date of Birth 10 September 1997
Nationality Bahraini

3. EDUCATION

Oct 2024 - Present **International Energy Engineering (M.Eng.)**
OTH Amberg-Weiden, Germany | GPA 1.7 (1.0 = best) | Graduating October 2027
Relevant Modules: Energy Efficiency (1.0), Wind & Hydropower (1.0), Simulation of Energy Systems (1.3), Energy Management with AI Methods (1.3), Solar Energy (1.7), Energy Law (1.7)
Key Projects:

- **Project ICARUS – Investment Feasibility Platform for Solar & Battery Storage**
- **Microgrid Simulation, Sizing & Dispatch Optimisation**
- **Wind Yield Analysis – Enercon E82 E2, Freudenberg**
- **Rooftop PV System Design – 143 kWp, NORMA GmbH**

Sep 2015 - Jun 2020 **Mechanical Engineering (B.Sc.)**
University of Bahrain, Bahrain
Final project: Feasibility study evaluation on domestic waste biogas-to-electricity conversion system.
Internships during studies: Welding Inspection – Relay Engineering (Dec 2019–Jan 2020); Maintenance Engineering – Bahrain Pharma (Sep–Oct 2019); Engineering Consultant Trainee – Bahrain Steel via Intelaaq (Jun–Aug 2019).

4. PROFESSIONAL EXPERIENCE

Sep 2022 - Jul 2024 **Key Account Lead – Aftersales Department**
BFG International, Bahrain | 1.9 years

- Grew annual invoicing by 12.5% by retaining and expanding European rail accounts – DB, SNCF, Talgo, and Alstom, across the full technical inquiry and proposal cycle.
- Independently built an Excel quotation automation tool and a Power BI KPI dashboard for order tracking, both adopted as department standards, eliminating manual reporting.
- Coordinated end-to-end delivery execution across procurement, logistics, and engineering for precision rail components; managed warranty claims and retrofit service coordination at European client facilities.

Apr 2022 - Aug 2022	Testing and Balancing Engineer Commissioning Services International, Bahrain 5 months Performed TAB commissioning of air-side and hydronic HVAC systems; documented airflow, pressures, and pump performance to project specifications.
Feb 2021 - Aug 2021	Mechanical Engineer – Piping Networks TMAM Contracting, Bahrain 6 months Developed IFC-compliant piping and MEP coordination drawings via AutoCAD; prepared technical submittals and procurement documentation to international standards.

5. TIMELINE NOTE

Aug 2021 – Apr 2022	<i>Self-directed training in Excel (VBA, Macros) and Autodesk Inventor; active job search.</i>
Jul 2024 – Sep 2024	<i>Relocation to Germany; preparation and enrolment for M.Sc. at OTH Amberg-Weiden.</i>

6. SKILLS

Energy Modelling	Python (Oemof, Pyomo), LP optimisation, dispatch modelling, sector coupling, BESS, H ₂ P2G
Engineering Tools	Excel (VBA, Macros, CoolProp), MATLAB, AutoCAD, Autodesk Inventor, Polysun (PV Design)
Data & Analytics	Python (pandas, NumPy, SciPy), Power BI, Streamlit, time series analysis
Life Cycle Analysis	GaBi advanced by Sphera, cradle-to-grave chain modelling
Professional Dev.	DataCamp – Data Analyst in Python (36 hrs, April 2026)

7. LANGUAGES

German	B1
English	C1 – IELTS certified

8. INTERESTS

Professional: Municipal Heat Planning, urban energy transition, electricity market analytics, techno-commercial strategy, UI design for energy management dashboards.

Personal: Hiking | MMA | Modern Arts | Professional Street Photography
